

ALIASGAR HUSAIN

Ottawa, ON, Canada

+1-(613)-790-0563, aliasgar.xo@gmail.com

[linkedin.com/in/aliasgarhusain](https://www.linkedin.com/in/aliasgarhusain), <https://aliasgar.cloud>

TECHNICAL SKILLS

AI Agents & Gen AI: AI Agent Development (LangChain, LangGraph, Langflow), Generative AI (OpenAI, Azure OpenAI), Prompt Engineering, RAG, LLM API Integration, Guardrails & Output Validation

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure, GCP

Infrastructure as Code(IaC): Terraform, Pulumi, AWS CloudFormation

Containers & Orchestration: Docker, Kubernetes

CI/CD & Automation: Jenkins, Ansible, Github Actions

Programming & Frameworks: Python, JavaScript, Go, Shell Scripting, ROS2, OpenCV

Monitoring: Prometheus, Grafana

Networking & APIs: REST APIs, API Integration, Networking protocols (IP/TCP, OSPF, BGP)

ML, MLOps: ML concepts, model evaluation, AI Studio

Cloud Architect and Security: High Availability, Auto Scaling, Load Balancing, IAM Roles, OWASP

Business Analysis: Data Analysis & Interpretation, Documentation, EDA, Power BI

SOFT SKILLS

Problem-Solving: Able to analyze problems and find practical solutions through testing and research.

Communication: Able to clearly explain technical ideas during team discussions and presentations.

Team Collaboration: Experienced working in teams and contributing effectively toward shared goals.

RELATED EXPERIENCE

DevOps Engineer

Jan 2024 – Aug 2024

QuickInfra Cloud Solutions Pvt. Ltd, Pune

- Developed and maintained automation scripts for infrastructure deployment, significantly improving operational efficiency and reducing manual effort.
- Provided expert technical support for cloud-based applications, ensuring high availability and performance for clients.
- Collaborated with cross-functional teams to implement cloud solutions tailored to client needs, enhancing customer satisfaction.

Software Associate

Jul 2021 – Oct 2021

Indiba Business Solutions, Pune

- Contributed to the development and customization of ERP software, enhancing user experience and increasing client satisfaction.
- Delivered technical support and troubleshooting, achieving a high rate of rapid issue resolution.
- Engaged with clients to gather feedback and refine software to meet operational standards and connectivity requirements.

EDUCATION

Artificial Intelligence Software Development

Sep 2025 – Apr 2026

Algonquin College, Ottawa, ON

- Devised expertise in AI Software Development with emphasis on Python, data analysis, and machine learning model development.

Cloud Development and Operations

Sep 2024 – Apr 2025

Algonquin College, Ottawa, ON

- Developed expertise in cloud platforms (AWS, Azure), focusing on cloud migration, DevOps methodologies, CI/CD pipelines, and infrastructure automation.

Bachelor of Engineering in Computer Science

Apr 2019 – May 2023

Pune University, Pune

- Constructed a broad understanding of computer science, covering topics such as programming (Python, Java), data structures, AI/ML, and cloud computing fundamentals.

PERSONAL PROJECTS

Cloud-Native Application on Azure Kubernetes Service

Nov 2024 – Dec 2024

- Designed and deployed a scalable, microservices-based application hosted on Azure Kubernetes Service, enhancing modularity and performance.
- Integrated AI services (GPT-4 and DALL-E) using Azure OpenAI to deliver dynamic product descriptions and imagery, enriching the user experience.
- Implemented CI/CD pipelines with GitHub Actions for seamless build, test, and deployment automation across six independent microservices.

Streamlined CI/CD with Kubernetes and Jenkins

Feb 2023 – May 2024

- Designed an automated CI/CD pipeline utilizing Kubernetes, Jenkins, and Git, achieving 40% faster deployments and enhanced application resilience within a KubeFlow environment.
- Demonstrated skills in orchestrating Kubernetes services, streamlining code integration, and automating deployment workflows.

Application Deployment using Jenkins and Docker

Nov 2022 – Feb 2023

- Deployed a Java web application on Docker with Jenkins CI/CD, integrating Maven and SonarQube for code checks and streamlined deployment to Docker Hub, reducing deployment time by 35%.
- Built and deployed Docker images, automating the entire process from GitHub to Docker Hub.

CERTIFICATIONS & TRAINING

Azure Fundamentals

Jan 2024 – Present

Microsoft, Ottawa, ON

- Experienced in implementing Azure solutions, including virtual networking, IAM, and automation.

AWS Solutions Architect

May 2023 – Present

AWS, Ottawa, ON

- Developed skills in designing scalable, resilient, and cost-effective AWS infrastructure solutions.
